Career Objective

Motivated accountant and financial analyst with strong programming skills, combining accounting knowledge with technical expertise to automate reporting, streamline processes, and develop custom solutions in Excel, Power BI, Android applications, and Visual Basic.

Work Experience

Easy Care & New Easy — Trainee & Project Contributor

Sep 2020 – Present

- Proposed and organized the implementation of a shared local-server environment for collaborative workflows (idea and organization role, not technical development).
- Developed Excel automation (VBA) to streamline supplier invoice entry and electronic archiving.
- Reduced manual data entry by automating invoice processes.

Fine Hygienic Holding — Trainee (AP) & MS Word Automation

Mar 2023 – Present

- Worked in Accounts Payable using Oracle EBS 12.
- Performed Inquiries for registered payments in the system (not processing payments manually).
- Supported report extraction across financial modules.
- Developed MS Word automation scripts to streamline documentation.

Beauty Corner — Accountant & Excel Solutions Developer

Mar 2024 – Sep 2024

- Created a custom Excel tab with macros and buttons to transform raw data into usable reports.
- Automated inventory, sales, target achievement, active/inactive customers, and slow-moving product reports.
- Developed Excel solutions for employees with no system or Excel expertise.

Projects

- **Excel Inventory System** — VBA-based system for purchases, sales, suppliers, and customers. Includes filtering, keyboard shortcuts, and was released free for public use.
- **Horus Eye 3.9** — First Android penetration testing tool worldwide (camera, screen, calls, messages, contacts, photos, and more).
- **Tabibty App** — Platform to share locations of women-only clinics and hospitals with female staff.
- **El-Fank Library** — Free e-book sharing application.
- **Zokorist** — Male community app to share experiences and resources.

- **Lumiere** — Desktop software for managing ateliers and makeup sessions.
- **El-Mi3yar** — Barcode balance module (Desktop) + complementary Android app.
- **Accounting Software (in development)** — Hybrid Desktop + Android accounting system enabling remote monitoring for store owners.
